GO SERIES LEG EXTENSION GO-S71

Help new users improve their lower-body strength with a leg extension designed for easy use and quick transitions. An extra-large seat offers excellent support, a self-adjusting tibia pad provides a comfortable starting position, and adjustable range of motion lets users build strength in a way right for their body.

The guide rods can be removed without any tools at all for quick, easy maintenance. A durable metal shroud withstands tough environments and can be removed with only two bolts to streamline service.

Large, color-coded placard demonstrates start and finish positions while highlighting active muscle groups. Storage space keeps personal device, water bottles and towels in reach while reducing clutter.

Go Series features a small footprint and back-to-back design, improving traffic flow and making it easy to configure your space. Each single-station unit has a low starting weight and minimal to no adjustments, so users can get started right away.
